

Holland Industrial is an Employee Owned Company (ESOP)

## On-Site Services

April 2007

To further complement our In-Shop Repair Services for Electric Motors, Gearboxes and Pumps we are now offering On-Site Predictive Maintenance Services as listed below: Please call Patrick Brame, or your salesman @ 800-232-7541 to discuss your needs.

		<p>Using our Ludeca OptalignPlus Shaft Alignment System You can be assured that your equipment will be aligned correctly for the long haul and ensuring your best shot for long lasting machine production. One time, done right !</p>
		<p>Have Thermographic inspections of your Electrical Panels carried out to show you any abnormal heating changes taking place. Full Reports are provided with all inspections. Let us explain other practical uses for this equipment that will help you with your Maintenance tasks.</p>
		<p>For the past 30 years, SPM has been a pioneer in shock pulse measurement, which identifies the condition of the most common mechanical component—the rolling element bearing. This instrument allows us to measure the condition of the bearings and their lubrication in your electric motors.</p>
		<p>Have the vibrations of your critical motors tested regularly to monitor changes that are bound to take place over time. A “Waterfall” Spectrum Graph can be provided which makes vibration analysis easier to understand. Be forewarned and thus forearmed.</p>
