

Panel Shop Q & A

Let Eddie Quote Your Next Panel

On Site Thermal Studies

Large Panels in Stainless Steel

Wye Delta Starter

Q1. Whose motor controls do you use in your panels?

A1. We use **ABB, Danfoss or Siemens Control** components and we can quickly build your Control Panel needs.

We can also use components from the manufacturer of your choice.

Over the years we have tended to **specialize in panels associated with AC and DC motor controls**. We can build to your design, or we can supply a turnkey package for you, from design to Start-up with drawings.

Q2. Can you build UL panels?

A2. We are **a certified UL 508 Panel Shop**, so this will help you when this certification is needed.

Q3. Can you carry out thermal inspections of my switchgear and other electrical controls?

A3. Yes, we can carry out **thermographic inspections of your Electrical Panels. The work is done by Eddie Garland** (picture above) using our **Flir Model P45 HSV infra red camera**. This unit will show you any abnormal heating changes taking place.

Full detailed reports are provided with all inspections.

Q4. Can you supply and build stainless steel panels?

A4. No problem. In the picture above is a large stainless steel panel being built by 2 of our guys..

Q5. How about Wye Delta starters?

A5. On the right above is a **Wye Delta Starter**, supplied for a Saw Mill customer.

These Wye Delta starters can be built very quickly for those of you in a hurry, from components in stock.

Q6. Who should I call if I need a panel quoted?

A6. Please call Eddie Garland @ 1-800-232-7541 Ext. 21, or your salesman. Thanks.
